

FOR IMMEDIATE RELEASE:

Monday 18 September 2017

**EasyJet to install to flight-test a new total cabin air filtration system.**

The Sunday Times, London, reported on 17 September 2017 that *“EasyJet to filter toxic air in cabins”*

The GCAQE congratulates EasyJet for being the first airline in the world to plan to flight test the new Pall Aerospace total cabin air filtration system. The system will be presented this week, at the 2017 Aircraft Cabin Air Conference.

The Aircraft Cabin Air Conference, September 19 and 20th at Imperial College London, will see over 30 leading speakers from around the world discuss their research, findings and thoughts on the on-going contaminated air issue in aircraft.

Tickets, press and media accreditation can be obtained here:
